Word of the Month

CURIOSITY

Being curious about anything and everything leads to developing your knowledge base and creativity. People who curiously inquire about things build connections between pieces of information, growing the ability to be better problem solvers and overall thinkers. To understand the world, question everything! Be inquisitive.

- Ask open-ended questions. Start broad and then get more specific on a subject.
- Follow your interests. Research things you want to know more about.
- READ. Ask for recommendations from others on topics to read about
- Make a list of topics you want to look into.
